

RECOVERING HUMAN SECURITY

***Human security
Not a surety
In the aftermath of war.
Many vulnerable
Conditions insuperable
In the depths of lives unsure.***

***Rebuild and reform
Facilitate a civilised norm
Are the crux of recovery.
Understanding politics
Grasping social dynamics
Are the first voyage of discovery.***

***Symptoms and causes
Triggers and forces
Must be widely acknowledged.
Assessments of needs
Human Rights decrees
Must be commonly practised.***

***Approaches holistic
Local ownership intrinsic
To achieving tangible outputs.
Active participation
Positive co-ordination
To producing desired results.***

***Appropriate action
Community protection
Becomes increasingly durable.
Not always a surety
Human security
Becomes increasingly sustainable.***
